

Accident Investigation

The course is designed to enable managers to react appropriately in this important activity to prevent a re-occurrence.

Whilst having an accident in the workplace is unfortunate; an accident also represents an opportunity to learn

The session includes

- Incident / accident investigation.
- Investigation Techniques
- Evidence collection and recording
- RIDDOR
- Recommendations and action plans.
- Practical exercises to reinforce learning

On completion of the course the delegates will have knowledge and understanding of the principles of accident investigation and will be able to carry out effective accident investigations, with appropriate recommendations to prevent a re-occurrence.

This course can be tailored to suit your needs
