

Asbestos Awareness

This course is designed to assist those people who work with, or may come into contact with, asbestos during their time at work.

The session includes

- What is asbestos
- Where it is found
- What to do if it is found
- Management plans
- Legislation covering working with asbestos
- Minor and Major work
- Case study

On completion of the course the delegates will have knowledge and understanding of where asbestos can be found and the actions to be taken should it be found in the workplace.

This course can be tailored to suit your needs
