

Competent Ladder Inspector

This course is designed to enable those persons who work with ladders or are responsible for those who work with ladders.

The session includes

- The legislation covering ladders and working at height
- The hierarchy of controls for working at height
- Correct and incorrect use of ladders
- How to inspect a ladder
- Practical exercise

On completion of the course the delegates will have knowledge and understanding of what ladder safety, when to use or not use ladders, and how to inspect a ladder.

This course can be tailored to suit your needs
